RESPONSE TO AMENDMENT

1. Claims 1-6 are pending in the application, claims 5 and 6 have been withdrawn.
2. Amendments to the claims, filed on April 12, 2006, have been entered in the above-identified application.

WITHDRAWN REJECTIONS

3. The 35 U.S.C. §112 rejection of claims 1-4, made of record in office action mailed December 13, 2005, page 2, paragraph #5 has been withdrawn due to Applicant's amendment in the response filed April 12, 2006.
4. The 35 U.S.C. §102 rejection of claims 1-4 over Kubota (US Patent No. 6,168,851), made of record in office action mailed December 13, 2005, page 3, paragraph #7 has been withdrawn due to Applicant's amendment in the response filed April 12, 2006.

REJECTIONS

5. **The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.**

Claim Rejections - 35 USC § 103

6. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franck et al. (U.S. Publication No. 2002/0114911) and evidences by U.S. Patent No. 5,552,177, U.S. Patent No. 5,735,889, and U.S. Patent No. 5,792,176.

Art Unit: 1772

Franck discloses an object (*title*) of synthetic thermoplastic material (*claim 15*). The object has a contact surface that is rough, where Rz is in a range from 40 μ to 100 μ , more specifically 55 μ to 70 μ (*claim 9*). The arithmetic mean roughness Ra lines in the range from 6 μ to 25 μ , more specifically 10 μ to 15 μ (*claim 8*).

Franck fails to disclose that the redetacable adhesive device is disk-shaped.

It would have been an obvious matter of design choice to change the shape of adhesive, since a modification would have involved a mere change in size of the adhesive. A change in size or shape is generally recognized as being within the level of ordinary skill in the art, absent unexpected results. MPEP 2144.04 (I) and (IV). Furthermore, one of ordinary skill in the art would have been motivated to change shape in order adapt the adhesive to different surfaces. As evidenced by U.S. Patent No. 5,552,177, U.S. Patent No. 5,735,889, and U.S. Patent No. 5,792,176 adhesives can be made in to disk shapes to suit different user needs.

The limitation “for use as an intermediate between parts” is deemed to be a statement with regard to the intended use and is not further limiting in so far as the structure of the product is concerned. In article claims, a claimed intended use must result in a *structural difference* between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. MPEP § 2111.02. Furthermore, it is noted that Franck’s redetachable device is an adhesive sheet made to fasten things together (*page 1, paragraph [0004]*).

ANSWERS TO APPLICANT'S ARGUMENTS

7. Applicant's arguments in the response filed April 12, 2006 regarding the previous rejections of record have been considered but are moot due to the new grounds of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
